## February 2016

This month we will introduce the theme ***“A Trip to Space it”***

Through this monthly topic, we aim to help children to discover knowledge about the exciting world of Space. This amusing themed unit incorporates a lot of science as it will take us to the moons of Jupiter and explore the possibility of life in these distant worlds. We will travel through the vastness of the universe and discover just how much space there is actually in Space. In addition, Space explorations allow us to use our imagination and have fun through hands-on experiences. We can travel to other planets, create spacesuits and rockets and investigate interesting scientific things.

From the night sky and its array of stars to the wandering planets and the comets, our broader universe have fascinated humankind and stimulated the imagination of generations. Thereafter, we want through “Trip to Space” to fascinate our young learners with the wonders of cosmos. Lastly, we want students to discover how and why modern day scientists are pushing the limits of Space investigation every day. In addition we will learning about ***Korea***. In art they will learn about the artist of the month ***“Katsushika Hokusai”***

### VPK INFORMATION

Dear Parents, as you may know, VPK registrations are open. Parents wishing to enroll their children in the program must register them at Early Learning Coalition. (elcbroward.org) web site. Further Information will be sent home soon. We will have a
