OCTOBER 2015

THEME OF THE MONTH

This month we will introduce the theme “**The Colors of Fall**”. The country of the month is **Costa Rica**, the children will learn about it through different activities. Parents are welcome to share with us books or any activity that is related to the theme or country.

As children grow and explore, they certainly become more curious about weather and other natural signs of the changing seasons. Especially for young children, the continuing shift from one season to another can be difficult concept to grasp. However, we consider that the exploration of different seasons is a fascinate way to introduce a variety of scientific concepts and promote creative and artistic skills while having fun along the way. Therefore, through “The Colors of Fall” our students will be encouraged to observe, explore, hypothesize, examine, interpret and represent Fall season in different ways. Additionally, by exploring this themed unit our students will deepen their understanding of our connection with natural world and our connection with other living things.
