OCTOBER 2016

THEME OF THE MONTH

This month we will introduce the theme “Animation”. The country of the month is **Egypt** and the artist: **Fabian Oefner**. The children will learn about it through different activities. Parents are welcome to share with us books or any activity that is related to the theme or country.

When we hear the word animation we often think of cartoons designed for children. However, studying the topic of animation allows us to see animation from a different perspective. The world’s social and cultural diversity are represented through an animated series and cartoons. There are scenes of historic situations; social and political uprisings are represented, etc. Also, thinking about animation leads us towards different topics such as technological innovations and how these have changed our way of relating; let’s think, for example, of the projections that are being implemented in customer service. Now we are finding ourselves face to face with holograms that greet us when we enter certain places. Through animation we can also enter themes such as movement. How can we understand it? How are we able to give movement to inert objects? There are infinite elements around this topic of animation that we can reflect on and question. Let our imagination and creativity take us to explore the world of animation!
