MONTHLY EVENTS

MARCH 2015

THEME OF THE MONTH

This month we will introduce the theme “Bees” Through this monthly exploration we aim to help children to come to value bees and their important role in the environment. Motivating children to love bees and nature, is not only life enriching for the child, it is a great way to help warrant the environment will be protected for future generations. Moreover, we are seeking to help students to discover knowledge about bees and the vast world of insects. Children will learn what makes an insect, name different insects and their characteristics and compare and contrast different kinds of insects. Also, our young learners will discover that bees are the only insects that make food we eat and that bees are pollinators vital to our food chain. Actually, one third of the food we eat would not be available but for bees. Investigating with our students all these interesting things about bees we will emphasize not only to what the bees can do but also how they do it. Subsequently, children will value the importance of collaboration and teamwork.

The artist of the month will be Fabian Oefner and the country will be Australia.
